

FIXED

VERSUS

NON-FIXED

VOIP

WHAT IS THE DIFFERENCE?

A physical address is a must, and you need your own cables to install fixed VoIP

.....

Difficult to make international calls due to complicated process and high charges

.....

Fixed VoIP numbers sometimes fail to work when moved beyond the coverage areas.

.....

You don't get any number while operating outside of your covered area.

No need to have a physical address and cables for non-fixed VoIP installation.

Non-fixed VoIP number offers easy international calling at cheapest rates possible.

.....

Entire calling system is operated via the internet so enjoy uninterrupted communication anywhere.

.....

You get a virtual number anywhere you go. Plus, international charges are low,
